

Papers presented at the World Geothermal Congress 2000 by former Fellows of the UNU-GTP (names of UNU-GTP Fellows in bold).

Amdeberhan, Y., and Bjornsson, G.: Well testing and reservoir engineering studies at the Tendaho geothermal field, Ethiopia. WGC2000, CD-ROM, 901-907.

Bakht, M.S.: An overview of geothermal resources of Pakistan. WGC2000, CD-ROM, 77-83.

Bakht, M.S.: Borehole geology and hydrothermal alteration of well KJ-28 Krafla high-temperature area, NE-Iceland. WGC2000, CD-ROM, 947-952.

Balmes, C.P.: The geochemistry of the Mt. Balut island geothermal prospect, Davao del Sur, Philippines. WGC2000, CD-ROM, 959-964.

Batik, H., Koçak, A., Akkus, I., Simsek, S., Mertoglu, O., **Dokuz, I.**, and Bakir, N.: Geothermal energy utilisation development in Turkey -present geothermal situation and projections-. WGC2000, CD-ROM, 85-91.

Beyene, K.: Chemical and isotopic studies of geothermal prospects in the Southern Afar region, Ethiopia. WGC2000, CD-ROM, 977-983.

Bhogal, P.S.: Reservoir models of the Olkaria geothermal project (1975-1985). WGC2000, CD-ROM, 985-989.

Bogie, I., Cartwright, A.J., **Khosrawi, K.**, Talbei, B., and Sahabi, F.: The Meshkin Shahr geothermal prospect, Iran. WGC2000, CD-ROM, 997-1002.

Bojadgieva, K., Hristov H., **Hristov, V.**, and Benderev, A.: Status of geothermal energy in Bulgaria. WGC2000, CD-ROM, 93-98.

Bromley, C.J., **Khosrawi, K.**, and Talebi, B.: Geophysical exploration of Sabalan geothermal prospects in Iran. WGC2000, CD-ROM, 1009-1014.

Buñing, B.C., Noriega, M.T., **Sarmiento, Z.F.**, and Malate, R.M.: Experimental injection set-ups for downhole chemical dosing. WGC2000, CD-ROM, 3033-3038.

Bustamante, C.C.: PNOG geothermal projects: a holistic approach to environmental management. WGC2000, CD-ROM, 539-544.

Chen, Z.: Analyzing the long-term exploitation stability of Beijing geothermal field from geothermal water chemistry. WGC2000, CD-ROM, 1053-1058.

Dai, C., and Liang, J.: Direct and indirect low temperature geothermal district heating systems. WGC2000, CD-ROM, 3395-3399.

Dimitrov, K.V., **Gorgieva, M.**, and Popovski, K.G.: Geothermal energy resources and their use in the Republic of Macedonia. WGC2000, CD-ROM, 3407-3413.

Dong, Z.: The roles of local government in the administration of geothermal resources in China. WGC2000, CD-ROM, 747-749.

Dor, J., and **Zhao, P.:** Characteristics and genesis of the Yangbajing geothermal field, Tibet. WGC2000, CD-ROM, 1083-1088.

Du, S.: Exploration, development and utilization of geothermal resources in Tibet. WGC2000, CD-ROM, 1095-1101.

Fendek, M., and Franko, J.: Country update of Slovak Republic. WGC2000, CD-ROM, 175-181.

Fendek, M.: Reservoir modelling study of Galanta area. WGC2000, CD-ROM, 2555-2560.

Fendekova, M., and **Fendek, M.:** Evaluation of Horna Nitra geothermal reservoir (central part of Slovak Republic). WGC2000, CD-ROM, 2561-2565.

Fotouhi, M., and **Noorullahi, Y.:** Updated geothermal activities in Iran. WGC2000, CD-ROM, 183-185.

Franko, J., and Majersky, J.: Geothermal heating project-ziar Nad Hronom (Slovakia). WGC2000, CD-ROM, 3415-3419.

Georgieva, S.I., and Vlaskovski, I.: Structure and geothermal potential of the Bourgas hydrothermal basin, Bulgaria. WGC2000, CD-ROM, 1151-1156.

Gordon, I.M., Maghiar, T., and **Antal, C.:** The 2MW electrogeothermal power plant from the University of Oradea. WGC2000, CD-ROM, 3229-3232.

Gorgieva, M.S., Gorgiev, D., Popovski, K., Dimitrov, K., and Manasov, S.: Inferred section of the main (low- temperature) geothermal systems in the Republic of Macedonia. WGC2000, CD-ROM, 3421-3425.

Grajeda, C.: The geothermal energy in the globalization process. WGC2000, CD-ROM, 795-798.

He, L., and Xiong, L.: Extensional model for the formation of geopressed geothermal resources in the Yinggehai basin, South China sea. WGC2000, CD-ROM, 1211-1216.

Hristov, H., Nikolova, N., and **Bojadgieva, K.:** Utilization of geothermal waters for space heating in Bulgaria. WGC2000, CD-ROM, 3447-3452.

Hristov, V., Bojadgieva, K., and Benderev A.: Dissolved helium as indicator for geothermal water prospecting. WGC2000, CD-ROM, 1253-1258.

Idris, M.: Geothermal evaluation for thermal fluids of helwan springs Egypt. WGC2000, CD-ROM, 1295-1299.

Isabirye, E.M.: Geothermal energy in the development of Uganda. WGC2000, CD-ROM, 229-235.

Jordan, O.T., Borromeo, C.R., Reyes, R.L., and Ferrolino, S.R.: A technical and cost assessment of silica deposition in the palinpinon-I geothermal field, Philippines, over 16 years of production and reinjection. WGC2000, CD-ROM, 2099-2104.

Kamah, M.Y., Silaban, M.S., and **Mulyadi:** Cooling indications of the Ulubelu geothermal system, South Sumatra, Indonesia. WGC2000, CD-ROM, 1319-1323.

Kepinska, B.: The Podhale low-enthalpy system (S-Poland): geothermal characteristics. WGC2000, CD-ROM, 1343-1348.

Kepinska, B., Bujakowski, W., and Ney, R.: Geothermal energy country update report from Poland. WGC2000, CD-ROM, 253-259.

Lu, R., and Liang T.: Exploitable capacity of high temperature reservoir of Yang-yi-xaing geothermal field of China. WGC2000, CD-ROM, 2707-2711.

Malapitan, R.T., and **Reyes, A. N.**: Thermal areas of the Philippines. WGC2000, CD-ROM, 1395-1400.

Malate, R.M., Buñing B.C., Molina, P.O., Yglapaz, D.M., and **Lacanilao, A.M.**: SK-2D: a case history on geothermal wellbore enhancement, Mindanao geothermal production field, Philippines. WGC2000, CD-ROM, 2139-2144.

Malolepyz, Z.: Low-enthalpy geothermal waters in coal-mines, upper Silesia coal basin, Poland. WGC2000, CD-ROM, 1401-1406.

Marani, M., **Tole, M.**, and Ogallo, L.: Concentrations of H₂S in air around the Olkaria geothermal field, Kenya. WGC2000, CD-ROM, 649-661.

Mariita, N.O.: Application of precision gravity measurement to reservoir monitoring of Olkaria geothermal field, Kenya. WGC2000, CD-ROM, 2719-2724.

Martinovic, M., and Milivojevic M.: The hydrogeothermal model of Macva. WGC2000, CD-ROM, 2145-2151.

Maturgo, O., Zaide-Delfin, M., **Layugan, D.**, and Catane, J.: Characteristics of the volcanic-hydrothermal system in Mt. Labo, Philippines, implications to development. WGC2000, CD-ROM, 1431-1436.

Mertoglu, O., Canlan, A., Bakir, N., **Dokuz, I.**, and Kaya, T.: Geothermal direct use applications in Turkey: technology and economics. WGC2000, CD-ROM, 3505-3510.

Milivojevic, M., and **Martinovic, M.**: Geothermal energy possibilities, exploration and future prospects in Serbia. WGC2000, CD-ROM, 319-326.

Montalvo, F.E., and Axelsson, G.: Assessment of chemical and physical reservoir parameters during six years of production-reinjection at Berlin geothermal field (El Salvador). WGC2000, CD-ROM, 2153-2158.

Moya, P., and **Yock, A.**: First five years of exploitation at the Miravalles geothermal field. WGC2000, CD-ROM, 3233-3238.

Mulyadi: Magnetic telluric method applied for geothermal exploration in Sibayak, North Sumatra. WGC2000, CD-ROM, 1469-1472.

Mulyadi: Ulubelu, the most developed geothermal area in South Sumatra. WGC2000, CD-ROM, 1463-1468.

Mwangi, M.: Country update report for Kenya 1995-1999. WGC2000, CD-ROM, 327-335.

Nagy, S., and **Dlugosz, P.**: Identification of the low-enthalpy Podhale geothermal reservoir based upon long term interference and pulse hydrodynamic testing. WGC2000, CD-ROM, 2739-2744.

Ofwona, C.: Recent reservoir studies of the Olkaria geothermal field, Kenya. WGC2000, CD-ROM, 2767-2772.

Pang, Z.: Isotope geochemistry of geothermal waters in northern north China basin: Implications on deep fluid migration. WGC2000, CD-ROM, 1559-1564.

Pasvanoglu, S., Kristmannsdóttir, H., Björnsson, S., and Torfason H.: Geochemical study of the Geysir geothermal field in Haukadalur, S-Iceland. WGC2000, CD-ROM, 675-680.

Penev, I., and Shterev, K.: Geothermal resources and utilization of geothermal energy in Bulgaria. WGC2000, CD-ROM, 1571-1574.

Quijano, J.: Exergy analysis for the Ahuachapan and Berlin geothermal fields, El Salvador. WGC2000, CD-ROM, 861-866.

Radeckas B., and **Lukosevicius, V.:** Klaipeda geothermal demonstration project. WGC2000, CD-ROM, 3547-3550.

Ranjit, M.: Geothermal energy update of Nepal. WGC2000, CD-ROM, 387-395.

Rosca, M.: Combined geothermal and gas district heating system, city of Oradea, Romania. WGC2000, CD-ROM, 3555-3560.

Rosca, M.: Heat transfer in a low enthalpy geothermal well. WGC2000, CD-ROM, 1651-1656.

Sanchez, D.R.: Geochemical assessment of low-temperature geothermal fields in Philippine geothermal system: the case of Mabini (Batangas) and Montelago (Naujan, oriental Mindoro) geothermal prospects. WGC2000, CD-ROM, 1675-1680.

Sánchez Upton, P.: The wellbore simulator SIMU2000. WGC2000, CD-ROM, 2851-2856.

Sasradipoera, D.S., Sujata, I.K., and Komaruddin, U.: Evaluation of steam production decline trends in the Kamojang geothermal field. WGC2000, CD-ROM, 2857-2862.

Sbita, L.B., and Magnusson, J.T.: Control system study for agriculture geothermal utilisation in the Elhamma region-Tunisia. WGC2000, CD-ROM, 3561-3566.

Serpen, U., Yamanlar, S., and **Karamandersi, I.H.:** Estimation of geothermal potential of Büyük Menderes region in Turkey. WGC2000, CD-ROM, 2205-2210.

Simiyu, G., and **Tole, M.:** Concentrations of trace elements in waters, soils, and plants of the Olkaria geothermal field, Kenya. WGC2000, CD-ROM, 681-688.

Simiyu, S.M., and Malin, P.E.: A Avolcanoseismic@ approach to geothermal exploration and reservoir monitoring: Olkaria, Kenya and Casa Diablo, USA. WGC2000, CD-ROM, 1759-1763.

Solis, R.P., Fragata, J.J., Bondoc, E.L., and **See, F.S.:** Calcite deposition in two-plase lines in Bacman geothermal production field, Philippines. WGC2000, CD-ROM, 3309-3313.

Soltani-Hosseini, M., Sigurdsson, H.G., and Thorolfsson, G.: Simulation and performance analysis of the new geothermal co-generation power plant (OV-5) at Svartsengi. WGC2000, CD-ROM, 3315-3320.

Staňasel, O.: Scaling problems which could appear at geothermal water utilization in western part of Romania. WGC2000, CD-ROM, 3567-3572.

Sun, Z., and Ármannsson, H.: Gas chemistry and subsurface temperature estimation in the Hveragerdi high-temperature geothermal field, SW-Iceland. WGC2000, CD-ROM, 2235-2240.

Swarieh, A.: Geothermal energy resources in Jordan, country update report. WGC2000, CD-ROM, 469-474.

Teklemariam, M., Beyene, K., Amdeberhan, Y., and Gebregziabher, Z.: Geothermal development in Ethiopia. WGC2000, CD-ROM, 475-480.

Teklemariam, M.: Chemical and thermal changes in the Aluto-Langano geothermal field, Ethiopia: from fluid inclusion study. WGC2000, CD-ROM, 2247-2256.

Tokita, H., Takagi, H., Kiyota, Y., Matsuda, K., Hatanaka, H., Shimada, K., Inuyama, H., Young, R., Bayrante, L.F., **Jordan, O.T.**, Salera, J.M., and Bayon, F.E.: Development and verification of a method to forecast hot springs interference due to geothermal power exploitation. WGC2000, CD-ROM, 725-730.

Wang, L., and Wang, N.: Geothermal development in Xiong county, Hebei province, China. WGC2000, CD-ROM, 1933-1936.

Wang, K., and Li, C., and Zhu, J.: Reservoir evaluation for the Wuqing geothermal field, Tianjin, China. WGC2000, CD-ROM, 3103-3108.

Wang, Y., Liu S., and **Pang, Z.:** Geothermal resources in the Jidong area, North China basin. WGC2000, CD-ROM, 1941-1945.

Yao, Z., and **Bi, E.:** Environmental imprints on the temporal changes of the chemistry of geothermal water from some low-temperature geothermal fields in the North China plain. WGC2000, CD-ROM, 1979-1984.

Yglopaz, D.M., Austria, J.J., Malate, R.C., Buñing B., Sta. Ana, F.X., Salera, J.R., and **Sarmiento, Z.:** A large-scale well stimulation campaign at Mahnagdong geothermal field (Tongonan), Philippines. WGC2000, CD-ROM, 2303-2307.

Yock Fung, A.: Chemical and isotopic studies in the Miravalles geothermal field, Costa Rica. WGC2000, CD-ROM, 1991-1996.

Zhang, B.: Role of the government in development and management of geothermal energy in Tianjin of China. WGC2000, CD-ROM, 771-776.

Zhao, P., Dor J., and Jin, J.: A new geochemical model of the Yangbajing geothermal field, Tibet. WGC2000, CD-ROM, 2007-2012.

Zhou, X., Wang, X., Yang, S., Yu, H., and Zeng, Y.: The analysis of geothermal field characteristics in Sichuan basin of China. WGC2000, CD-ROM, 2013-2017.

Zhou, X., Zhong, B., and Dai, Y.: A static correction technique for seismic survey in rugged exploration areas. WGC2000, CD-ROM, 2019-2024.

Zhu, J., and **Wang, K.:** The analysis of space heating index on low enthalpy geothermal heating system. WGC2000, CD-ROM, 3599-3604.

Zmaranda, D., and Gabor, G.: State of the art of the automatic control and monitoring system from the geothermal power plant from the university of Oradea, Romania: present and perspectives. WGC2000, CD-ROM, 4099-4104.

Papers presented at the World Geothermal Congress 2000 by staff members of the UNU-GTP.

Fridleifsson, I.B., 2000: Prospects for geothermal energy worldwide in the new century. WGC2000, CD-ROM, 789-794.

Fridleifsson, I.B., 2000: Geothermal training in Iceland 1979-1999. WGC2000, CD-ROM, 565-571.

Fridleifsson, I.B., 2000: Geothermal energy for the benefit of the people worldwide. World Geothermal Congress 2000, Kazuno Geo-Friendship Forum, June 4, 2000, p.5-9.

Georgsson, L.S., and Fridleifsson, G.O., 2000: The geothermal exploration of the Öxarfjörður high-temperature area, N-Iceland. WGC2000, CD-ROM, 1157-1162.
